Collecting, Processing and Maintaining IOI Statistics

How did the cutoffs in % of total points
change over the years?

The Results of IOI'94

Each of the 189 participating students could obtain at most 200 points. The International Jury selected the following point ranges for medals:

Gold medals: 195 -- 148 (16 students)
Silver medals: 145 -- 96 (35 students)
Bronze medals: 95 -- 65 (50 students)
No medals: 62 -- 0 (88 students)

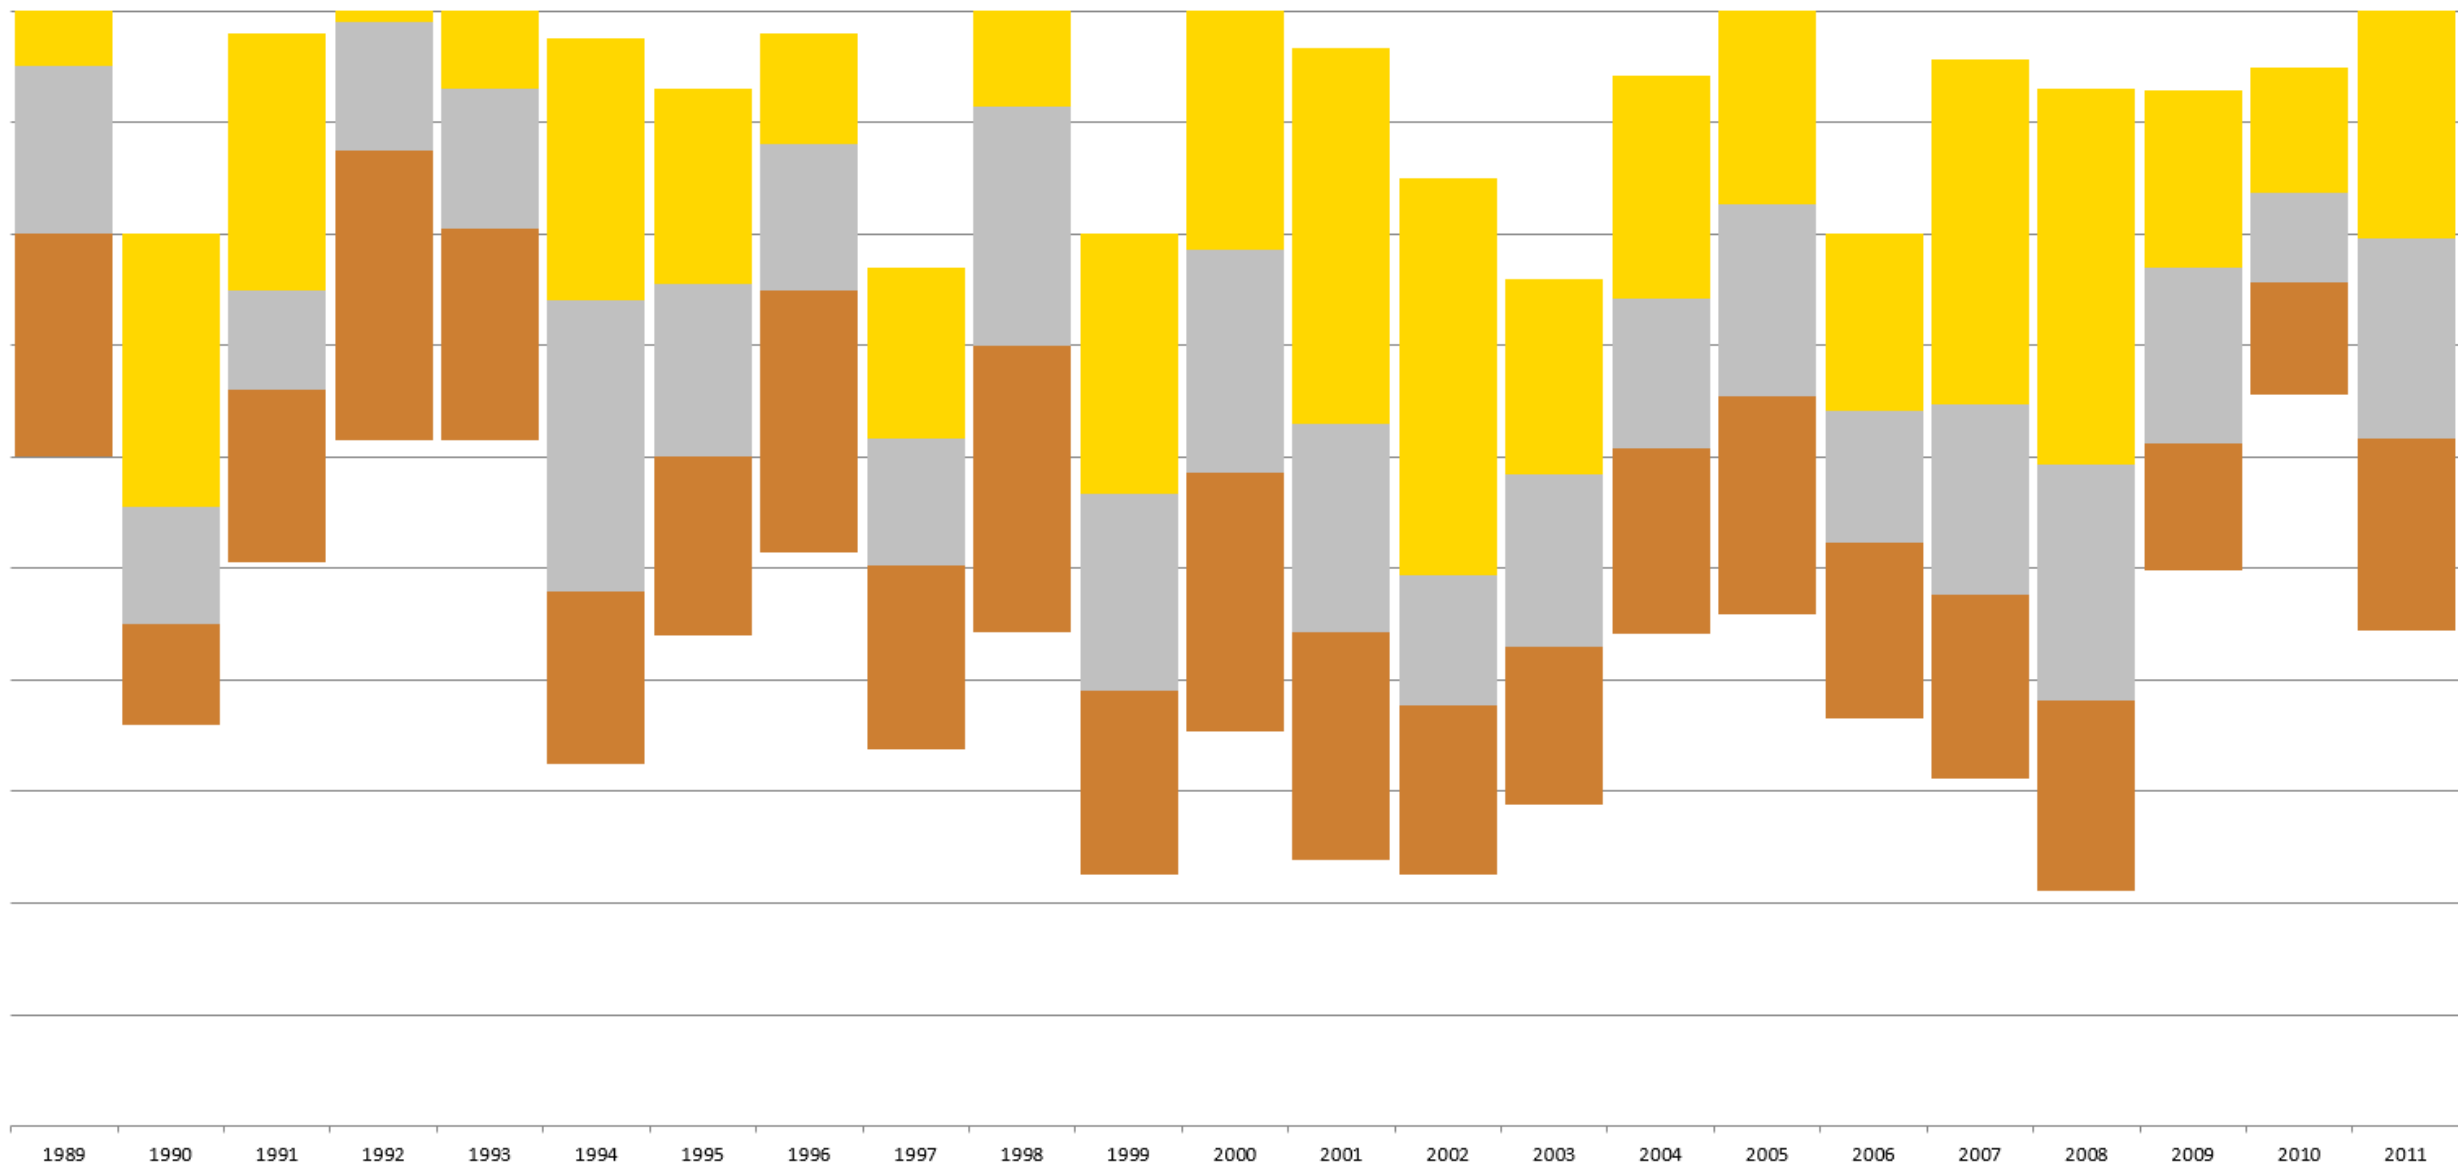

Here is the list of medal winners. Some names may contain spelling errors due to transmission problems (please send correction to ioi-secretariat@win.tue.nl). Viktor Bargatchev, the number one, also received the IFIP Trophy from the *International Federation for Information Processing*.

International Olympiad in Informatics The Results

About this website

I began this project when I realized there was no website where you could easily access the results of all the IOI. Furthermore, sometimes there was no consistency among existing websites regarding the format of results, so I tried to address that problem as well. Finally, I chose to put all information in Microsoft Excel because that way you can have instant flexibility on the data. Also you can import the data to some sort of database very easily, so maybe some day this will grow out into something like [what the IMO has had for years](#).

What have I done?

- Imported the results of all the IOI into Microsoft Excel using the fullest possible information I could find on the Internet (see the Downloads section for more info on what is available).
- Converted it all to a common format: same column names, layout, country names for all years. I even made such a layout that you can easily print the worksheets.
- Converted contestants' names so that the same person has the same name in every year. This was done by using various algorithms to determine similar names and checking them by hands afterwards to decide if they really might be the same person (same country and two consecutive years, for example). Furthermore, I performed some more checks against existing information. Obviously, there are no guarantees that I have found them all and correctly, but I honestly believe the percentage of successful conversion is very high.
- Combined all IOI medalists into one separated worksheet. Also created a worksheet with the information on medal cutoffs with a chart provided.
- Using available data, created 2 separate worksheets with information on how many medals each contestant and country has earned.

Notes

There are some further notes I would like to make about the data. You can download the full .xlsx file below, but I have also saved each year's results as a .pdf and .csv file for better accessibility. If the .xlsx changes, the corresponding .pdf and .csv will be updated as well. Next, for ensuring better country statistics, there are 2 countries in the data which might appear different in official data. Here, the Federal Republic of Germany appears as Germany in 1989–1990 and the Federal Republic of Yugoslavia appears as Serbia and Montenegro in 1992–2002. Furthermore, it appears that there are only two contestants sharing the same name in the data: Chen Zheng (first from China in 1993 and 1995, second from China in 2000). Keep this in mind working with the data. Finally, some notes regarding the second and third teams of a single country. I have found data on them in the following IOI: 1989, 1996, 2003, 2004, 2007, 2009, 2010 and 2011. In 1989, 1996 and 2004 those teams are ranked in the official data, so I counted their members towards the medalists (and they appear in the medalists' worksheet without a team number). For other years they are stated as unranked in the official data, so I didn't count their members towards the medalists. I believe this is the correct way to do this.

1990's

Also you can import the data to some sort of database very easily, so maybe some day this will grow out into something like what the IMO has had for years.

Naïve Eduard Kalinichenko, 2011

Didn't happen.

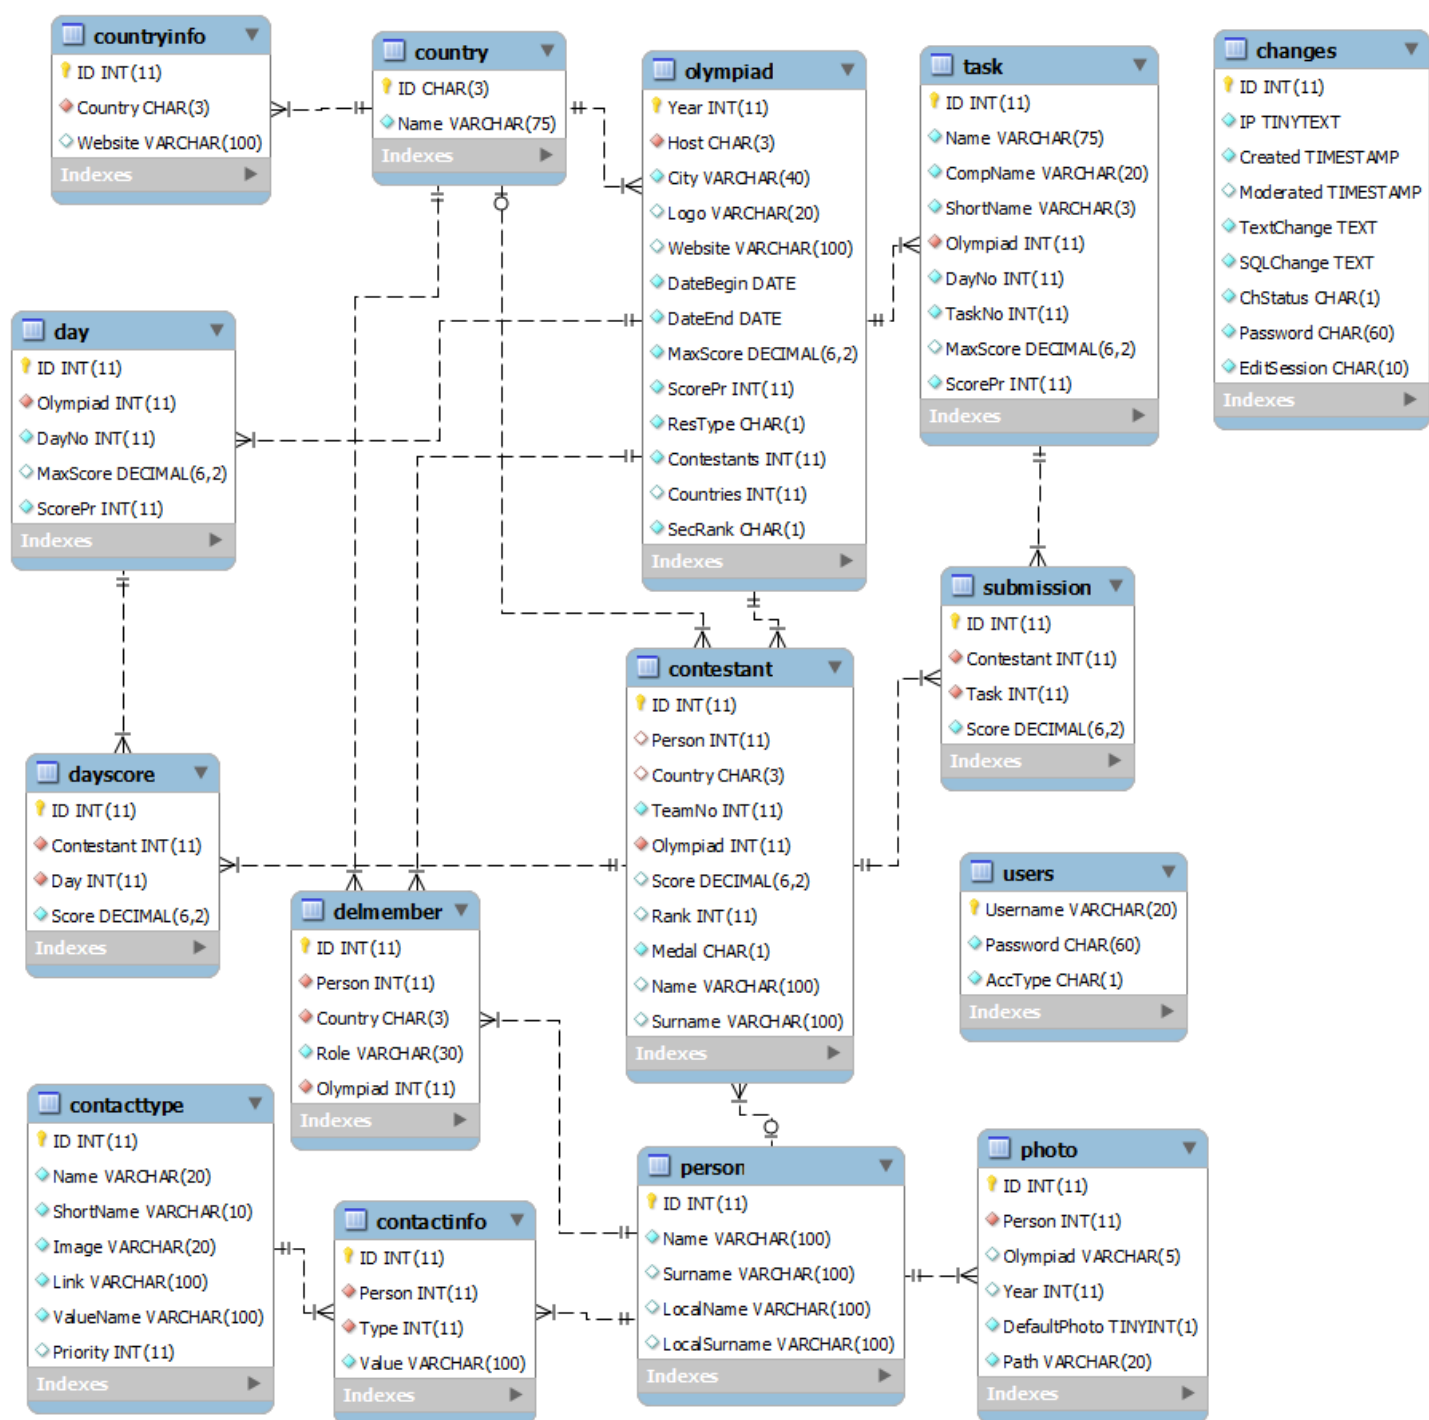

Obviously.

International Olympiad in Informatics – Statistics

[Olympiads](#) [Countries](#) [Tasks](#) [Hall of Fame](#) [Search](#)

[Add](#) [Login](#)

This is an International Olympiad in Informatics database.

This site is intended to give anyone an opportunity to easily contribute the missing data. All changes will be checked before inclusion. Please, create a new person only if you're sure that he or she isn't already in the database. Currently, the big goal is getting the lists of all participants and leaders, as I already have all medalists. For some countries full data is obtained – check the country list for more information.

If you have a correction that is not yet supported by the system, bug report, feature request or any other related information, please contact me by [e-mail](#).

Country Representation

For ensuring better country statistics, there are 2 countries in the database which might appear different in official data. The Federal Republic of Germany appears as [Germany](#) in 1989–1990 and the Federal Republic of Yugoslavia appears as [Serbia and Montenegro](#) in 1992–2002.

Second/Third Team Status

- At IOI 1989, the second and third teams have been ranked and they have received the medals.
- At IOI 1996, the second team hasn't been ranked, however they have received the medals and so, those medals are displayed in the statistics.
- For all other IOIs, where second/third teams are known, they haven't been ranked and haven't received any medals.

If you have any additions or corrections of the information above, please [contact me](#).

Credits

- Author: [Eduard Kalinichenko](#)
- A huge thanks to [Oleg Oshmyan](#) for always helping me on the technical side.
- Also a big thanks to [Sergey Melnik](#), [Vjačeslavs Kaščejevs](#) and [Mārtiņš Opmanis](#) for supporting this project and giving me fresh ideas.
- Finally I would like to thank [Ilham Kurnia](#) and [Mojca Miklavc](#) for providing a massive amount of data in the early stages of this project.

Current moderators: [Mārtiņš Opmanis](#), [Eduard Kalinichenko](#), [Oleg Oshmyan](#).

early 2000's

IOI 2013 Participants

By professorbrill, 3 years ago, , 

I really liked the previous year's [post](#) on IOI participants so I decided to do the same for this year.

UPD: Colors updated

| Name | Country | Codeforces Handle | IOI 2012 Result |
